

North Craven Historical Research Group Archive

Only available on application to NCHT

CONTENTS LIST

Indexed pdfs

The files in this collection were sorted as far as possible from all the publically accessible material held on the North Craven Historical Research Group computers in about 2010. The Group is now defunct. Many files had been converted to pdf but only about 10% of the total. The reduced pdf set amounts to 1833 files and 3.8Gb. The remaining 39,648 non-converted files amount to 51.7Gb and some have become unreadable since they use obsolete software. There is some duplication of files between these two sets. The NCHT website cannot handle this amount of material nor can further sorting be contemplated. It is all now held on a 64Gb flash drive placed in the archives of NCHT. Copyright material and items not relevant to North Craven or now readily available on the internet have been deleted from the set of pdfs. There is some duplication of items between headings. Individual folders/files might be made available by email but some folders are very large and other means would have to be employed to make them available. Browsing would have to be arranged on site in Settle.

A certain amount of material was submitted by Reg Postlethwaite and Roy Price and much else by unknown persons. Some of the filenames do not reveal content with clarity but the task of changing them is too demanding.

NCHT disclaim any responsibility for content and will remove anything deemed to be copyright.
